
Circuit Wizard 2 Full Version Free 494

May 17, 2007 - I NEED A SUB-CHIP MODEL FOR COMPONENTS: TL494 (PWM GENERATOR). I tried unsuccessfully to use the Component Wizard, I modified TL493 OrCAD. It seems to me that this way will not work, since I used a different type of TL494, and I cannot find a way to change this. I tried using TL494C, TL494P4, TL499, TL499, TL499, TL499. If I may ask you to provide me with information on how to change the type of TL494 to use this method (use the Component Wizard) I would like to use this scheme. I've tried on another computer that can use the Component Wizard, but the diagram doesn't work.
