Take on the role of a Tarnished Lord, and save the Lands Between from the clutches of the Old God, Fal-Goron. Your ancestors entrusted you with the power of the Elden Ring, the power to unleash and control the elements. The Old God attacks a town that has refused to pledge their allegiance. They have but one option to ensure their victory - invade the Lands Between, and make it their own. This is your story, and the game you'll be playing is the game of the Lands Between. ABOUT WELCOME TO TOKAI STUDIO: Tokai Studio is a boutique team of developers devoted to creating high-quality, unique, and immersive experiences for mobile and console gaming. Based in Osaka, Japan, Tokai Studio is committed to creating games that allow players to escape for a short while and experience a new world. Tokai Studio's games include: - The Lands Between, a fantasy action role-playing game featuring a sweeping story, complex dungeons, and a multiplayer experience (iOS App Store, PC). - Sea of Trees, a humorous platformer/survival game (PC App Store) - Rebirth, a Zelda-style action game (iOS App Store) - Red Hot Chili Peppers 2013, a rock-paper-scissors game based on Red Hot Chili Peppers music (Android App Store) - Fortune Clash: The Lost City, a puzzle game about a woman who rescues children from their kidnappers (iOS App Store) - Pride Simulator, a dating game about a young man who has to compete with females (iOS App Store) ABOUT THE ELDEN RING FRAMEWORK The Elden Ring framework is a technology that allows the development team to create games that appear like pixel art but actually contain complex designs. The developer can achieve a high level of realism and detail without using a large amount of memory, making it possible for the game to run smoothly even on devices with limited resources. The shape and action of the gameplay are determined by the game engine, which ensures that the theme and atmosphere are fully supported, providing a sense of permanence, solidity, and weight to the game world. The Elden Ring framework also has built-in mechanisms that can be used to create user interfaces and multimedia content, which greatly increases the quantity and quality of content produced by developers.
