You are trapped inside a square where you have to escape by jumping on platforms. Ticket to Ride is an, train themed 2D platformer with a goal of reaching completion. All game elements and logical decisions are designed around the base concept that there is just one train to reach your destination. Platforms can be manipulated around obstacles and gravity, just like train tracks. Gameplay is not designed as an RPG, it's a singleplayer storygame. The developer cares about everything and wants to provide the best experience for everyone. The unique experience of Ticket to Ride can only be found in the first person view. It's not a light game, but rather a game you play the entire day while being trapped inside a rectangular box with a goal of escaping. Ticket to Ride is a game of color matching, not map drawing. There are no pieces or cards to collect. If you miss a puzzle, the current puzzle is completed and a new puzzle will appear.

Controls

- You move with your mouse
- Use the left and right arrow keys to move
- Press A to jump
- Press B to turn your character left or right

About: Ticket to Ride is a board game created by Richard Garfield in 1984. The goal of this game is to place colored cards on your playing board. You choose two cards which are then matched and the game is completed. This game is designed to last you a long time. You can choose from five sets of game elements:

- Ticket to Ride Premium includes special game elements from the following sets:
- Brains
- Delights
- Duel
- Evolution
- Infinity

These game elements can be used to turn the final board into a 3D adventure or to add more options to your game. In 2014, the developer released an iOS version of the game for iPhone and iPad. What's more, the game has two visual styles which can be adjusted in a variety of ways. The art style is bright, cheerful and cartoon-like. The visual style is a cartoon-like style inspired by The Ren & Stimpy Show, the first two seasons of South Park and various cartoon movies. There are lots of details and a large amount of hand-drawn elements. Every puzzle is hand-drawn and you can use special effects like blurring, distortion, etc.
