Yahoo Messenger Automater Full Crack is the ultimate tool to control YM's status messages, including: "Not at my desk", "Invisible", "Busy", "Available", "Call me", "Step out" and many more. System

Requirements: Windows 98/XP/2003/Vista Yahoo! Messenger remains one of the most popular instant messaging solutions in the world and every single tool that enhances its features can enjoy a lot of success. Yahoo Messenger Automater Crack Free Download is a simple application that provides you an innovative way to control YM's status messages, comprising dedicated tools to perform status changes at a given time. Basically a task scheduler focused solely on Yahoo's messaging client, Yahoo Messenger Automater is also able to automatically sign you in or off at a user

defined time. The program's interface is very easy to understand and operate, especially since it hosts all the functions in a single window. Using Yahoo Messenger Automater is a breeze because you can simply input the Yahoo Messenger executable file path and then enter the time to perform the selected task. You can either sign in if you're not already online, but you can also change status messages to 'available', 'invisible', 'busy','stepped out', 'be right back', 'not at my desk', 'on the phone' or any other custom message. Just press the 'Start Timer' button and you're all set. You also have the option to minimize the app to

tray or stop the timer in case you wish to cancel the scheduled task. The application needs only few computer resources to run properly and with all the modern Yahoo! Messenger versions, so you shouldn't encounter too many problems with it. So as a conclusion, Yahoo Messenger Automater could be a very handy tool if you're a fan of online chatting with YM. The simple GUI and accessible functions make this utility well suited for all users out there. Yahoo Messenger Automater Description: Yahoo Messenger Automater is the ultimate tool to control YM's status messages, including: "Not at my desk", "Invisible",

"Busy", "Available", "Call me", "Step out" and many more. System Requirements: Windows 98/XP/2003/Vista Yahoo!
