To evaluate the therapeutic value of ceramic fiber in the reconstruction of craniofacial defects following tumor ablation. 17 cases of maxillofacial defects after tumor resection were repaired with combined ceramic fiber and Mevicor in the department of oral and maxillofacial surgery, Peking University School and Stomatology Hospital from August 2004 to July 2006. The follow-up was 14 to 36 months. Successful reconstruction without infection, and no obvious tendency of fracture was obtained. Fourteen patients could walk without any assistance, and their clinic features were uniform and satisfactory, with satisfactory appearance. The appearance of the defects repaired with ceramic fiber alone was satisfactory. But there were few reports on the application of ceramic fiber in maxillofacial reconstruction. The combination of ceramics and the artificial bone can repair the maxillofacial defects after tumor resection.Doll Doll (also called a dollhouse) may refer to: Dolls (face powder), a powdered blusher or face powder Doll (technology), a handheld device that reads data from an optical bar code Doll House (disambiguation) Antique doll, a type of doll Stuffed doll, a type of doll Doll (chess), a chess piece that is a modified bishop Doll (novel), a 2010 crime novel by the author Elizabeth George Doll (magazine), an American dolls' magazine Dolls (punk band), an Australian punk band Dolls, a demo recorded by English goth band Cocteau Twins Dolls may refer to: Acronyms, initialisms and similar Digital rights organisation Drive-by shooting

The synthesis of gold nanorods by means of ultrasonic irradiation of a gold nanoparticle solution is reported. It is shown that not only the diameter and length of the gold nanorods are determined by the initial size of the gold nanoparticles, but also the anisotropy of the gold nanorods is related to the size and morphology of the initial gold nanoparticles. When the gold particles are isolated and the excess gold ions are removed, the gold nanoparticles can be encapsulated in a metal or oxide shell, and the consequent change of the original electronic structure is responsible for the variation of the resulting anisotropy.Q: How to get a value from a function, not an object I'm trying to pull a value from a function, not an object using jquery. I'm fairly new to programming so I think I'm missing something basic. I have an array of markers that each contain a lat/long. I use function to populate a map and on that, a function to determine if a given lat/long is within one of the markers and returns the value "yes" or "no". I need to get that function to return a value instead of "yes" or "no". var markerList = ["#jurisdiction-info-name", "#skagit-info-name", "#desert-info-name", "#salish-info-name", "#all-info-name", "#central-info-name", "#south-info-name", "#west-info-name", "#north-info-name", "#east-info-name"]; function showInfoBox(sLat, sLon, sInfo) { // normal
